"Sad Sack Shattuck" Ski Portrays Interest, Necessity For New Chemistry Building

A ski illustrating the interest of Modern Chemistry students in the building of a new chemistry building was presented at the meeting held in Kendall Hall last evening. The club of 127 members is planning for a new chemistry building from interest in research and industrial firms.

The name of the ski, portrayed for "Sad Sack Shattuck, Jr.'s" short story, is expected to be in circulation by tomorrow.

The students participating in the ski were Joan Bruder as "Enquirer, Stattuck," Mary Miner as "Percy, Sad Sack Shattuck, Jr." Benacy Schenone, president of the Chemistry Club, was in charge of the meeting.

Among those attending were interested in chemical courses, each majoring in bio-chemistry, organic chemistry, inorganic chemistry, and in general science, and other students, including those in general science.

At the meeting plans for the new building were discussed, the ski was presented to the chemistry department, and a minute was given to the students. The ski was also given to the Chemistry Club of the University of Illinois.

The drive for the new building has been in progress for many years, due to the lack of space in the present building. The drive is in full swing and many students are actively participating.

Many Foreign Basketball In

Basketball, the world's most popular sport, is now played in sixty countries, and the drawing total in the United States alone has increased from 8,000,000 in 1945 to 15,000,000 paying spectators in recent years.

The game was invented to provide exercise for the army and to aid in the competition between football and basketball. Basketball was introduced in the United States by James Naismith, a teacher at the Industrial Institute in Springfield, Mass., in 1891.

The first basketball game was played on December 21, 1891, and the first six-man teams were introduced in 1893. The game was played on a court measuring 90 by 54 feet with wooden backboards.

The game was modified in 1936 and became the modern game as we know it today.

The National Basketball Association (NBA) was founded in 1946 and the first official game was played on November 1, 1946. The NBA is made up of 30 teams, representing 29 cities and 17 countries.

The NBA is the most popular professional basketball league in the world, with its games broadcast on television in over 190 countries.

Looking Forward

As we enter the final two weeks of the first semester perhaps we should take a minute or two to look back at what we have accomplished by way of academic and non-academic achievement since September.

Certainly we have learned much in our classes this semester, and now that most of our term papers are written we feel a tremendous sense of completion and relief. In the non-academic sphere of activity we spent many hours arguing the pros and cons of establishing the campus radio station this year. We won the battle this time and the radio station will be open to a D.P. student next year. Finally this week we voted in favor of both of these projects with the assurance that the campus as a whole will benefit.

Next semester will be a busy one, and we all will have to work hard to carry out our commitments concerning the radio station and the Drive. Even the students who have given to the college have given to the radio station for the sake of its students. It has at last been authorized, we must continue our active enrollment this year and of reopening the Marie Perier Drive for a D.P. student rsoay>.

The national budgetary problems hit home: We therefore felt that the present schedule (grill closing at 5:45 and food service from 11:30 to 11:45) would enable the students to purchase sandwiches until a later hour.

We also want you to be willing to work hard, and we will have to be willing to accept the responsibilities we have taken upon ourselves.

There are other problems for which we must find solutions in the near future. Mr. Hamilton on Tuesday will discuss the possibility of offering an accelerated program to students starting this summer.

Although we do not have the final say in the inauguration of this system, our considered approval or disapproval of the plan will be an important factor in the final decision by the faculty and administration.

The News is still receiving letters from students who criticize the behavior of the members of the college community at lectures and concerts. This, too, is a real problem; perhaps second semester will bring a method to improve the situation.

We will have to be on our toes second semester. We will have to be willing to work hard, and we will have to be willing to accept the responsibilities we have taken upon ourselves.

In the meantime, we wish good luck to everyone on exams.

And let's hope we come back in two and a half weeks ready to pitch in for the rest of the year.

Sincerely,
Barbara Chadwick, '53

To Compare Various Resorts

the Mount Holyoke campus, retorts skiing area has a rope tow and T-Bar and either center to the slope.

$5.50 Including meals and transportation as well as for the advanced examinations, Monday through Friday, Jan. 27. Breakfast for the janitors is by Sally Holmes, leading the way from the second quarter forward.

The first quarter moved slowly and ended in a 2-1 tie. AIC forged ahead to make the score at the half Read 15-10 in favor of AIC. Holyoke tried to match baskets in the third quarter, but AIC scored seven points to the visitors five to make the score at the end of the third quarter 20-15.

The seniors outscored AIC in the last quarter by one basket but failed to gain the lead. The seniors at the final whistle read 20-25 in favor of AIC.

Coles and Rams led the scoring for the winners with nine points each, while live Lemke and Ivy Maxwell shared high scoring honors for Holyoke with six points each.

Let's hope that old man winter produces his most skiable weather these next two weeks for that joyous time when you plan to budget your residence at the library. In preparation for these great events, here are a few suggestions for your rejuvenation.

Mount Holyoke pride itself on its excellent winter sports facilities. Don't let the winter pass without taking advantage of ski instruction by the AA sponsored pro, Fred Weisbrod, who will teach on FAGMENT on Saturday afternoons. It is also possible to make arrangements for additional help on Saturday mornings and Sunday afternoons.

Upon request, Mr. Weisbrod will give group instruction to those interested in a fee of $1.50 per person and private lessons to one at $2 per person. This charge takes care of transportation to his slope and for the tow if you choose to use it.

In the skating department, the common twins will teach on the Mount Holyoke rink. Even if you are beyond lessons, or consider yourself a hopeless case, come on down to the rink and take a turn or two in time to the music. Anyone can keep time on skates regardless of peculiar position or collapsed ankles.

Abercrombie welcomes Mount Holyoke to ski on their ski slope, Tinker Hill. There's a reasonable fee for the use of the tow. Seasonal tickets at $7 are available for the hill throughout the season.

The slope is open on Tuesdays and Thursdays from 1:30-4:30 p.m. and Saturdays and Sundays from 10 a.m. on. Ski instruction will be given on Saturdays and Sundays—group lessons.

Number II... THE OPPOZUM

"Thereby hangs a tale!"

The class clown went out on a limb and tried to prove cigarette mildness by the quick-trick method! He tried the fast inhale, fast exhale test—a whiff, a sniff—and they still left him up in the air!

But then he got his feet on the ground. He learned that there is a reliable way to discover how mild a cigarette can be!

And that test is...

The sensible test ... the 30-Day Camel Mildness Test which simply asks you to try Camel as a steady smoke—on a pack after pack, day after day basis. No snap judgments needed. After you've enjoyed Camels—and only Camels—for 30 days in your "T-Zone" (T for Thousand, T for Taste), we believe you'll know why...

More People Smoke Camels than any other cigarette!

methods of diplomacy, and raises the question of appeasement, or even acquiescence, at least of principle.

As opposed to these older methods, never successful in the past against a Power bent upon world domina-

tion, stands the newer attempt to maintain world law and order with justice through an international or-

ganization whose members are unequivocally pledged to collective armed action against states found to be breakers of the peace.

The story of the United Nations' efforts in Korea are well known. It would seem increasingly clear that under the existing conditions they can proceed only in the measure in which members of the United Na-
tions are prepared to pursue single-mindedly the newer values attendant upon achieving security through law-
enforcement as more important than the uncertain protection of imperial interests, or even a precarious peace sought through diplomatic compri-
mise.

The cause-and-effect proposals approved by the Political and Security Committee of the United Nations As-
sembly, containing, again, no word of condemnation for aggression patent-
ly committed, reveal the fact that this condition is not met. United Na-
tion members are attempting to straddle two quite incompatible and contradictory sets of concepts and methods of procedure.

It is, as a result, impossible to say at present, whether, as was recently suggested in the United States Sen-
ate, what is happening in Korea is, in fact, the Third World War, or the application of United Nations sanc-
tions.

The first pre-condition for the sur-

vival of western civilization is a clear-eyed decision as to whether we are in fact living in the 19th or the 20th century.

Can diplomatic negotiations, either inside or outside the United Nations, carried on by sovereign states, each striving to preserve its own national interests, protect those interests against the total power of the Soviet world in the technological twentieth century? Can even a league of “equal,” “sovereign” states with the canons of political organiza-
tion?

CALENDAR

Sunday, January 21
Morning Service. The Reverend Herbert G. Gezork, D.D., of Newton Centre, Massachusetts. 11 a.m., Abbey Chapel.
Yapper Service of Music. The Mount Holyoke College Orchestra, Sophomore Choir, and Dorothy Howell, Organist. 7:30 p.m., Abbey Chapel.

Monday, January 22
Exhibitions of Painting and Sculpture by South Hadley Artists. (Open week-days, 9 a.m.—6 p.m., Sunday, 2:30—4:30 p.m.) January 22—February 2, Dwight Hall.

Physical Education Department Moving Pictures. A Nation of Skiers; Ski Flight. Required of all students in Winter Sports Classes. 4:10 p.m., Hooker Auditorium.

Tuesday, January 23
Morning Assembly. President Ham. Required of all students. 9 a.m., Chapin Auditorium.

Wednesday, January 24
Semester Examinations Begin. 9 a.m.

Sunday, January 28
Morning Service. The Reverend Ralph H. Winn. 10:30 a.m., First Congregational Church, South Hadley.

Friday, February 2
Semester Examinations End.

Saturday, February 3
Observing Open To Visitors. Orion nebula, Praesepe, and Andromeda galaxy will be shown. 7-8 p.m., Observatory.

Sunday, February 4
Morning Service and Communion. The Reverend Ralph H. Winn. 10:30 a.m., First Congregational Church, South Hadley.
